TECHNICAL REQUIREMENTS

*** At the arrival of Boy Band Story, the stage must be empty and equipped with these technical demands.

Boy Band Story supplies their own lighting system, microphones as well as all other audio accessories needed for the show. (see design)

The venue must have on stage:

- 5 electric outlets of 110V at the back of the stage
- 2 electric outlets of 110V at the front of the stage (Left-right)
- 4 different breakers for the oulets
- 2 XLR inputs (Left-Right) at the back of the stage

MONITORING /AUX RETURNS

The group Boy Band Story uses IN-EAR Monitors. They also have a wireless with smart tablet soundboard to mix the inputs. Only the left and right outputs of their soundboard will be plugged in the main soundboard.

The entire sound system must be installed and operated by experienced techniciens.
It must be 100% operational by the time the artists and their technical team arrive

- If an electrical plugging is necessary, it shall be done by a **Master electrician**.

No monitors on the stage please
